PUBLIC NOTIFICATION

To alter water chlorination process

November 5th, 2024 through November 19th, 2024

Residents of: The Everglades City Drinking Water System

The City of Everglades will be temporarily converting its disinfectant process from chloramines to free chlorine residual beginning **Tuesday November 5th, 2024, through Tuesday November 19th, 2024.**

If you are on home dialysis we encourage you to contact your physician or dialysis provider to make sure you understand the proper steps you should take or aquatic species are advised to contact a professional aquarist to avoid any problems associated with chlorine.

This process will not cause adverse health effects. However, during this period, you may notice some discoloration and or cloudiness in your water. You may also find air pockets in the system. The discoloration and air are harmless. If you do experience this, you may want to run water through the tap until it runs clear. Some areas may also experience a temporary fluctuation in water pressure or a slight increase in the taste and odor of chlorine.

For questions regarding the change in the disinfectant process, please contact Palm Lake Estates North or US Water Services at 866-753-8292.

Date distributed: October 22, 2024
